

# UTAC Orders LTX's Fusion For Testing Advanced RF Devices

Mar 19, 2002

Fusion CX to test GPS, Bluetooth, Wireless LAN, CDMA and others

WESTWOOD, Mass., March 19, 2002 — LTX Corporation (Nasdaq: LTXX), a leading supplier of semiconductor test solutions, today announced that United Test and Assembly Center Ltd (UTAC), a dynamic semiconductor assembly and test services provider headquartered in Singapore, has ordered its first Fusion CX test system. The Fusion will be used to test a broad range of RF devices, including GPS receivers, Bluetooth, wireless LAN, PLL/LNA/Mixers, GSM and CDMA.

"In support of UTAC's mobile and wireless strategy, UTAC is pleased to have added the Fusion CX, and in being one of the first in the region to do so," said Y.H. Chok, Vice President of Test Operations for UTAC. "The Fusion CX provides UTAC with a High Performance, Low Cost RF Solution which is crucial to success in today's competitive RF market. With this investment, we are broadening our most cost effective RF test portfolio and capacity that our customers require, and leveraging our existing investments in the Fusion Test Platform. LTX's single platform approach gives us the flexibility to optimize our customers' cost of test today, and seamlessly address their future needs as RF technology migrates toward SOC devices."

"We have significantly strengthened the Fusion Test Platform with the addition of the Fusion CX," added David Tacelli, Executive Vice President of LTX. "It's the first test system on the market that offers customers high performance RF test capabilities in a compact, cost effective package. The Fusion CX demonstrates LTX's commitment to continued investment in innovative test technology to solve our customers' most pressing test problems."

## About the Fusion Test Platform

The Fusion Test Platform, which includes the Fusion HF and CX, offers One Test Platform with Zero Compromises. Coupling leading edge technology, scalability, enVision++ software and an advanced open architecture, Fusion provides high performance, cost effective test solutions across the device spectrum. LTX's approach allows customers to select the best configuration to meet their economic and performance requirements of today while enabling their technology roadmap of tomorrow.

## About United Test and Assembly Center Ltd (UTAC)

United Test and Assembly Center Ltd. (UTAC), founded on 16th March 1998, is a QS9000/ISO9001/SAC certified semiconductor assembly and test services provider. We offer full turnkey services from wafer sort / laser repair, packaging, Test / Burn in, Mark-Scan-Pack and drop shipment services. In addition, we provide customers with value-added services in package design and simulation, test program development and device characterization, failure analysis services and full reliability test services.

UTAC is committed to provide customers one-stop turnkey semiconductor assembly and testing services for wide spectrum of memory, logic and mixed signal devices.

UTAC World Wide Web address is <http://www.utac.com.sg/>.

## About LTX

LTX Corporation (Nasdaq: LTXX) is the only semiconductor test equipment company to offer One Test Platform with Zero Compromises, enabling high performance, cost effective solutions across the device spectrum of system-on-a-chip, mixed-signal, digital and analog integrated circuits. With headquarters in Westwood, Mass., the company has additional development facilities in San Jose, Calif., as well as sales, application support and service facilities throughout North America, Europe, the Pacific Rim and Japan. Please visit [www.ltx.com](http://www.ltx.com) for more information on LTX's products, services and technologies, or call 1-888-INFOLTX (1-888 463-6589) for investor information. LTX and Fusion are registered trademarks and enVision++ is a trademark of LTX Corporation.
